

BRYX

POWERED BY KCI

BUILDING INTELLIGENCE

BRYX™ is a transformative Model-as-a-Service (MaaS) platform, offering easy-to-use models specifically designed for the architecture, engineering, and construction (AEC) industry. Our pretrained computer vision, machine learning, and computational models allow you to take advantage of emerging technologies without requiring model training or specialized expertise. Simply upload and organize your data, run the selected models, and view and download your results directly from our secure cloud platform.

MODELS STREAMLINE OPERATIONS & IMPROVE DECISION-MAKING

BRYX models are designed for a variety of AEC disciplines, from utilities and transportation to construction and facilities.

MULTIPLE SOLUTIONS, ALL IN ONE PLACE

Browse through our model catalog to find the solution that fits. There's no need to train models; the infrastructure is built and ready to use, with models you need to optimize your processes.

MAXIMIZE AUTONOMY

BRYX models increase autonomy, save time, and uncover insights, allowing staff to focus on more strategic tasks that impact business growth.

COST-EFFECTIVE & SCALABLE MACHINE LEARNING

Scale machine learning to suit specific business needs. BRYX purchasing options include free trials, a premium subscription, and prepaid credits for on demand convenience.

UNLOCK POTENTIAL VIA API INTEGRATION

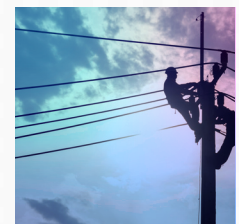

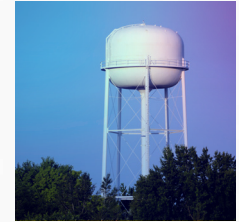

Run a model directly from BRYX with an easy-to-use interface. And BRYX models can be quickly and easily integrated with a third-party application via Rest APIs.

BOOST EFFICIENCIES, SAFETY & ACCURACY

BRYX offers computer vision models that help improve safety and optimize operations. And our RoboFlat™ solution improves the speed and accuracy of concrete floor flatness testing in robotic warehouses.

CONTINUOUS IMPROVEMENT

Your data keeps changing and so do our models. BRYX models are systematically monitored, retrained, and adapted to provide fine-tuned results.
